Personal Projects

- Radgost.me** 2025 - Present
Live restaurant website built with HTML, CSS, and JavaScript, focused on clean UI and responsive layout.
 - Tech stack: HTML5, CSS3, JavaScript (Vanilla)
 - Live: <https://radgost.me>
 - Designed and developed a production website with a clean, user-friendly layout.
 - Implemented responsive design for mobile, tablet, and desktop.
 - Built interactive UI components using vanilla JavaScript and ensured accessibility-focused structure.
 - Deployed the website and performed ongoing updates/maintenance (content and UI improvements).
- Boxing Store** 2025
Frontend product showcase website for boxing equipment with reusable UI sections and basic interactivity.
 - Tech stack: HTML5, CSS3, JavaScript
 - GitHub: <https://github.com/bane1901/BoxingStore>
 - Built structured, reusable sections and layouts using semantic HTML and modular CSS.
 - Added interactivity and dynamic behaviour using JavaScript (UI interactions and basic logic).
 - Applied responsive design principles and maintained clean code organization.
 - Used Git/GitHub for version control and iterative development.
